

## Project Design Phase-I – Problem Solution Fit

**Project Title:** Car Resale Value Prediction

**Team ID:** PNT2022TMID43312

Define CS, fit into CC	<b>1. CUSTOMER SEGMENT(S)</b> <small>CS</small>  People who are looking to buy or sell used cars.	<b>6. CUSTOMER CONSTRAINTS</b> <small>CC</small>  Lack of user-friendly, reliable and free technology, Lack of efficient algorithms, Lack of availability of secure and easy UI.	<b>5. AVAILABLE SOLUTIONS</b> <small>AS</small>  There are existing solutions that can predict the value for used cars but they are not very efficient and reliable. Also, with increase in dataset and factors algorithms might not perform well. So, the existing solutions lack the accuracy.	Explore AS, differentiate
	<b>2. JOBS-TO-BE-DONE / PROBLEMS</b> <small>J&amp;P</small>  To develop a feature set with the factors contributing to the change of price and to implement an algorithm to predict the resale value of a car.	<b>9. PROBLEM ROOT CAUSE</b> <small>RC</small>  The need for secondhand cars and the people wishing to sell their used cars. Customers have to do it in order to get a satisfactory value for the used cars.	<b>7. BEHAVIOUR</b> <small>BE</small>  Customers feel uncertain about the price and use the available technologies to get the resale value of a car.	

Focus on J&P, tap into BE, understand RC

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM	<b>3. TRIGGERS</b> <b>TR</b> Coming across the need of knowing the price of a secondhand car	<b>10. YOUR SOLUTION</b> <b>SL</b> To build a reliable technology that can address all the customer needs to predict the resale value of a car with all the factors contributing to the change of value of a car ensuring efficient functioning and results.	<b>8.CHANNELS of BEHAVIOUR</b> <b>CH</b> <b>8.1 ONLINE</b> Can access the website and upload the details of their car and usage to get the resale value with the current condition.  <b>8.2 OFFLINE</b> Customers can seek into the details and condition of a car to get an approximate value.	Identify strong TR & EM
	<b>4. EMOTIONS: BEFORE / AFTER</b> <b>EM</b> Before: Uncertain, worried and confused.  After: Relieved, clear and happy.
